

BARRICADES

- ◆ Barricades are designed to be rapidly constructed in emergencies when mine evacuation is not possible
- ◆ They are packaged as a complete kit including all tools required for construction
- ◆ System includes Strata Products' fully adjustable, quick to install Lock-N-Load support props
- ◆ One or two man installation includes raising upper member to the roof and setting with a clamp
- ◆ For barricades, Lock-N-Loads are installed at both ribs and in the center of the entry
- ◆ Framing timbers are then nailed to Lock-N-Loads at the roof and floor
- ◆ Brattice cloth is attached tightly and securely to timbers to form the barricade
- ◆ Spray applied polyurethane foam is used to seal edges
- ◆ A gas detector can be used to test for leaks and to monitor air quality
