

# SAND PROP™

## HIGH CAPACITY SUPPORT JACK

- ◆ The Sand Prop™ is a compact, high capacity prop, designed to be installed easily. No equipment or tools are required
- ◆ Sand Prop™ has a capacity of 60 tons
- ◆ It will provide up to 2 inches of deformation before buckling
- ◆ Available in lengths from 4 to 9 feet
- ◆ Each unit has 2 feet of height adjustment
- ◆ The ease of installation lends itself to quick placement and less labor requirements, which in turn increases productivity
- ◆ Sand Props can be reused by removing the wedges and recharging the sand into the upper unit
- ◆ A variety of headplate and footplate designs are available for special applications
