

AIRDOC®

Your first choice in mine safety.

AIRDOC is a change-over-station designed specifically to provide a clean, well-lit environment in which to exchange SCSR units and communicate during self-escape

- AIRDOC is a walk-thru design with an entry and exit door. Airlock barriers are in place at both doors to control air contamination.
- AIRDOC provides two levels of safety: a mine air filtration system and a patented powerless CO₂ scrubbing system.
- When AIRDOC is used in stand alone mode, it will provide in excess of 24 hrs of breathable air.
- Serves as SCSR storage cache.
- Designed for easy use and functionality, AIRDOC is virtually maintenance free.
- Stations come standard with fork lift slots, lifting and towing lugs for ease of movement throughout the mine.

AIRDOC®

Your first choice in mine safety.

FEATURES AND BENEFITS

- Change over for up to 50 people
- Cushioned seating for occupants
- Drinking water
- Air Powered Scrubber
- SCSR Storage
- Custom made racks to suit any self rescuers
- Can be used as Refuge Chamber if necessary
- Standard Size 12.5ft x 7ft x 7ft
- Sizes can be customised to suit customer requirements

SAFETY

- Back-up breathable air supply
- Airlock Entry with heavy plastic curtains to minimize quantity of contaminants entering the station
- Fire extinguisher
- Fully reflective signage for greater visibility
- High quality Mine Air Filter System
