

Gunite

Cementitious Spray-on Rock Liner

Gunite is a spray applied, high strength cementitious liner which provides structural strength, support and protection in excavations and construction areas.

- Gunite offers excellent protection against rock weathering and fire proofing
- Machines are electric and air or all air power systems and can be used above and below ground
- Product, equipment and services for Gunite application provided by Strata.
- Strata will perform site rehabilitation and preparation work, including scaling, bolting and cleaning, prior to gunite application
