

Carbon Monoxide Converter

Removing harmful CO from enclosed areas

The Strata CO Converter is a battery-operated, self-contained catalytic CO remover. It is used in enclosed areas to continuously reduce harmful CO gases.

- Uses a moisture-tolerant catalyst plated on a foil substrate
- Does not release dust into the atmosphere
- Infinite shelf life and no catalyst change-out required
- Battery designed to continuously run for 48 hours
- One unit per 20 person
- Can use multiple units for a larger application
- Magnetic mounts for quick installation

SPECIFICATIONS

The Carbon Monoxide Converter is housed in a cylindrical container with the following specifications:

- Diameter – 4 inches (102 mm)
- Height – 12.13 inches (308 mm)
- Weight – 4.5 pounds (2 kg)
