

Lock-N-Load™

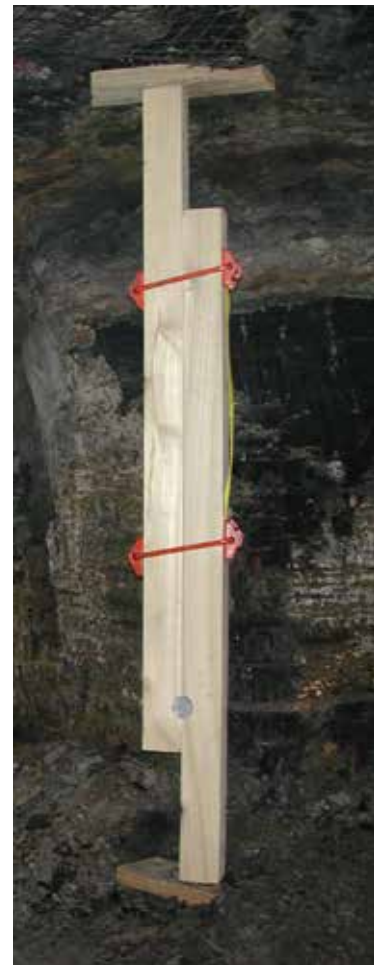

Adjustable Support

Lock-N-Load™ is an adjustable timber support prop available in a variety of lengths from 3 feet to 14 feet. Lock-N-Load has 2 feet of adjustable length which eliminates the need for cutting or trimming eliminating the need for cutting or trimming.

- Available in capacities of either 5 or 8 tons.
- Can be installed by one person and may be preloaded using a specialized wrench purchased with the unit.
- 2500 lbs(11kN) of preload can be applied.
- Can be removed and reused by releasing the clamps.
- Can be packaged with conventional cap blocks and header boards. In addition, various steel fittings are available to tie into steel or wooden beams.
- Can be applied in place of steel jacks, water props, or posts as a temporary support.
- Can also be used as formwork for stoppings, seals, barricades and ventilation curtains.
