Atmospheric levels should be maintained below the occupational exposure limits. When atmospheric levels exceed those limits or are unknown, respiratory protection is required.

For spray applications in well ventilated areas, use an approved full-face air purifying respirator or a powered air purifying respirator equipped with an organic vapor sorbent filter (EU Type A, NIOSH Black, etc.) and particulate pre-filter (EU Type P2 or P3, NIOSH N95 or better, etc.). A supplied air respirator may also be used and is often the preferred option.

Where spray application in poorly ventilated areas is unavoidable, a supplied air respirator should be used.
