## Change-Over-Station

The Strata AIRDOC Change-Over Station is a transitional station that offers miners a non-toxic environment in which to rest, exchange SCSR units and develop an escape plan to exit the mine.

- The AIRDOC®, Change-Over-Station is an ideal SCSR storage cache
- In an emergency, miners enter the AIRDOC®, remove their SCSR and replace it with a fresh SCSR provided. Upon exiting the unit, the used SCSRs are disposed of in a bin located near the exit door.
- AIRDOC® provides two levels of safety: a connection to mine air with a filtration system and a patented hazardous gas scrubbing system.
- Should mine power and mine air become compromised or unavailable, the AIRDOC® can provide in excess of 24 hours of breathable air.
- Designed for easy use and functionality, AIRDOC® is virtually maintenance free.
- AIRDOC® Change-Over-Stations come standard with fork lift slots, lifting and towing lugs for ease of movement throughout the mine. An IT attachment is optional \*
