

DigitalBRIDGE™

LAST MILE CONNECTIVITY

KEEP IT SIMPLE.

Fiber damage and repairs are costly and troublesome, but maintaining connectivity into your working section is vital. DigitalBRIDGE eases these challenges and reduces your costs, without sacrificing your bandwidth, speed and functionality.

SYSTEM BENEFITS

- DigitalBRIDGE is Power-over-Ethernet (PoE). It delivers power and high-speed Ethernet data over a single cable.
- Insert power anywhere along the network
- Fast to install, easy to maintain and repair coaxial cable
- No specialty equipment, tools or technicians required
- Complete flexibility in placement of Ethernet field devices
- Powers all connected devices
