

Donut Crib[™] & CribPac[®]

Concrete Roof Support

The E.Dillon Donut Crib[™] and CribPac[®] are patented high capacity circular concrete roof supports for underground mining. Cut-able fiber reinforced concrete and limited timber use, make these roof supports ideal for permanent support and for longwall moves.

- Steel-fiber reinforcement provides higher load capacity compared to standard concrete blocks
- Load Transfer Discs increase overall strength and provide additional yielding capabilities for active ground conditions
- Resistant to atmospheric deterioration and fireproof
- Concrete material provides both a “cut-able” and transportable waste material for mine-through applications
- All products are packaged on specialized pallets to accommodate underground travel

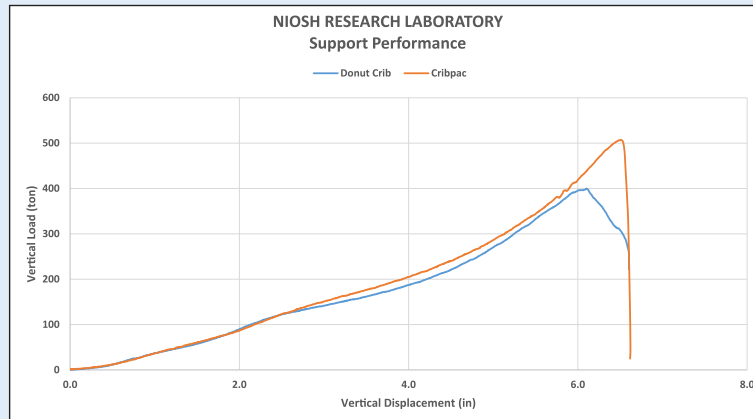

Donut Crib[™]

- Individual, compact, circular concrete blocks with an open center that stack in layers
- Construction allows for custom height options
- Timber foot and head boards to provide additional yielding

CribPac[®]

- Solid circular concrete blocks pre-package into various bundle heights
- Packs of block are confined with metal binding and wrapped in plastic to increase stability and minimize shifting
- Bundling with plywood lift layers provides optimal handling for mechanical installation and increased yield capacity
- Packs can be stacked to accommodate larger seam heights

APPLICATIONS

- Mine-through areas in longwall moves
- Pre-driven recovery rooms
- Cut-able support at rib-line in headgate and tailgate entries
- Pillar extraction areas
- Areas requiring high volume and high capacity supports
- Permanent support
- Support under beams and cross-bars

BENEFITS

- Fully "cut-able"
- Stable yield
- High strength in compact design
- Fire proof
- Will not shrink, rot or rust
- Reduce time for longwall move
- Easy install with scoop, forklift, or utility vehicles

SPECIFICATIONS

Donut Crib[™]

- 17.5 inch outer diameter x 4-7/8 inch inner diameter x 3 inches thick
- Support capacities up to 350 tons
- 60 units per pallet
- Load transfer discs included

CribStacs[®]

- 17.5 inch diameter pre-bundled packs
- Support capacities up to 450 tons

Pack heights:

- 4 Layer - 30 inch
- 5 Layer - 37 inch
- 6 Layer - 44 inch
- Two packs can be stacked for high seam heights
