Strata Stone Dusting – Preventing coal dust explosions in underground mines

AUTOMATIC DISPERSAL SYSTEMS – **PORTABLE DUSTERS**

Underground Static POD

AUTOMATIC DISPERSAL SYSTEM

Automatic Stone Dust System

Fully integrated, automatic stone dusting system for the pneumatic transfer and storage of bulk stone dust. It is a surface-to-underground pipeline designed to transfer and distribute large quantities of stone dust, greatly simplifying the process and reducing the amount of man-power required to accomplish the task.

- Single refill location at the surface – above ground silos
- Fully automatic, semi-automatic, or manual distribution underground
- Flexible options for manual hose dusting along pipeline
- Accessible underground storage for mobile stone dusters
- Considerable time and labour savings

Surface Silo

SYSTEM

Surface Silo

- Three capacity options. PLC controlled.
- Delivers bulk volumes of stone dust through a borehole to underground static PODs.
- One or two silo options per system

Twin Blow Tanks

- Each 1 tonne capacity.
- Surface mounted to deliver stone dust underground via borehole.

Underground Static PODs

- Two capacity options. PLC controlled.
- Deliver stone dust to development areas.
- Longwall tailgate dusting.
- Bulk transfer to other underground PODs.
- Bulk discharge, trickle dusting and manual dusting.

Mobile POD Trailer-mounted

- 6 tonne capacity. Manually controlled
- Transport bulk stone dust underground
- Refill other PODs or Flingers
- Bulk discharge, trickle dusting and manual dusting

Mobile Bulk Trailer-mounted System

- 50 tonne capacity
- Automatic system to deliver stone dust to longwall via borehole

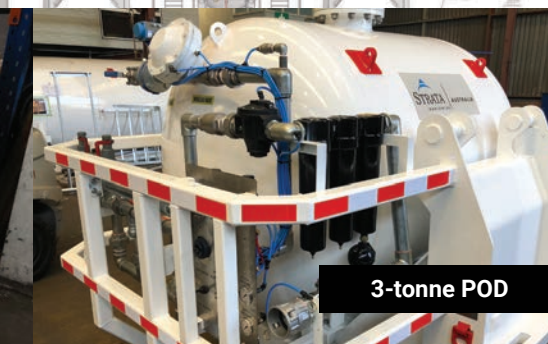

Twin Blow Tanks

6-tonne POD Trailer-mounted

1.2-tonne capacity hopper (flinger)

3-tonne POD

Maxi Duster

Spear Duster

POD & PORTABLE STONE DUSTERS

Strata Stone Dusters

High quality ruggedized and custom configured stone dusters.

POD DUSTERS

Multi-Functional: (applies to all sizes)

- Trickle dusting
- Manual/hose dusting
- Bulk dusting
- Bulk dust transfer

3-tonne Capacity POD

- Compact and mobile - QDS attachment & skid mounted options
- Pneumatic dry powder duster, operates on compressed mine-air
- Fully manual operation with no electric or electronic interface

6-tonne Capacity POD

- Heavy duty trailer mounted or skid mounted options
- Pneumatically controlled, fully manual operation and no electric or electronic interface
- Placed where needed for dusting and bulk material transfer to other equipment.
- Can be integrated into the Automatic Stone Dust System

20-tonne Capacity POD

- Static POD underground
- Placed where needed for dusting and bulk material transfer to other equipment
- Can be integrated into the Automatic Stone Dust System

1.2-tonne Capacity Hopper

- Compact and mobile –attachment and powering by LHD
- Twin rotating flingers centrifugally spray the stone dust outwards

Salter

- 1.2 tonne hopper with machine flingers modified to be used as a roadway salter.

PORTABLE DUSTERS

Spear Duster

- Delivers fast coverage using an engineered jet-pump
- No moving parts and no electrics
- Intrinsically safe and aluminium-free to meet mining regulations

Mini Duster

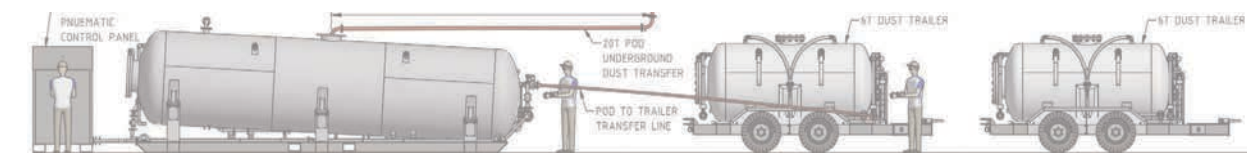

- Full bag capacity and delivers fast coverage using an engineered jet-pump
- No moving parts
- Intrinsically safe and aluminium-free to meet mining regulations

Maxi Duster

- Hopper design that holds 15 bags of stone dust
- Secure lid to seal against moisture
- Continuous discharge over 100 metres via a 50NB hose.
- No moving parts and no electrics
- Intrinsically safe and aluminium-free to meet mining regulations

Maxi Duster with Set & Forget

- Maxi Duster with factory set timer
- Steady discharge for 10-25 minutes. Automatic shutting down
- Dispersal into ventilation air stream achieves excellent coverage over long distance

More than a Supplier...

Strata maintains a successful track record by working closely with customers and fully understanding individual project needs. On-site and remote service capabilities provide ongoing support and troubleshooting and help to ensure system integrity.
